

## VIP Care Program

### **PUPPY & KITTEN PACKAGE • \$99** **UP TO 12 MONTHS**

Get your little one off to a good start in life with thorough exams and comprehensive testing for worms and parasites. Dr. Schmitt tests fecal matter with an advanced centrifuge process, considered the “gold standard” for detecting the presence of parasite eggs, which are often missed during a simple visual inspection for worms. Eggs hatch, and suddenly worms appear when it was thought there were none.

All South Reno Vet samples are sent to a reference lab with next day results.
